

Parkour - complete game template

This is a complete parkour game template. This resource pack contains 6 scenes: bamboo forest, Gobi, grassland, woods, runway, and forest hut at the end. With a little modification, you can build it on different platforms, including IOS, Android, Windows, and others. This resource pack solves the problems most parkour games will encounter. If you want to make a parkour game, then it will be very suitable for you.

How to play:

1. There is a gaming scene in the resource pack. Just run the scene and the game will start.
2. The way to control players on the Unity platform is by pressing the up, down, left and right keys on the keyboard or the W, A, S, and D keys.

This pack includes:

1. 6 beautiful scene prefabs
2. 1 character prefab with animation
3. Complete game logic code
4. Complete game sound effects
5. Complete UI
6. Multiple small object prefabs (obstacles, useful items, harmful items)
7. Role Life health Management System

PS: If you get any problems. Please don't hesitate to contact me.
